Experience

Wingify Pune
Senior Software Engineer May 2024 - Present

- Designed a background process to **create natural language descriptions of thousands of metrics across thousands of campaigns** with strong **LLM as a judge** evals thereby confidently upgrading prompts and using the right LLMs. I owned the pipeline end-to-end across 3 teams.
- Integrated **image generation using Flux Schnell** in VWO Editor Copilot allowing users to customize images along with text for their website variations.
- Initiated and setup self hosted **Langfuse** to instrument all LLM calls. This gave us visibility into feature wise token usage, latencies. We optimized prompts for couple of features helping in cost reduction. This is used org wide.
- In Feb'25 I was given the **CEO's club award** by upper management - a recognition for my work and initiatives over the past six months. I am also on the hiring team for GenAI roles at Wingify.

Nintee Pune
Founding Engineer – Early Stage Startup Jan 2023 - Apr 2024

- Created **content creation pipelines**, chaining multiple LLM calls using **GPT-4**, for mulitple mobile apps – generating quizzes based on a single word, active learning based on a book name. Used **Claude Opus as a quality control analyst** to review and modify content.
- Worked extensively on the **backend of the Nintee app**. The app helped users build or break habits with the help of a chatbot and a social feed. Designed database models, background processing via RQ workers. Proactively learnt and setup a **TDD** culture in the Engineering team.
- Designed the **Nintee Bot on Discord** to assess, breakdown and respond with an actionable plan based on the challenge mentioned by the User. The users would also get **contextual reminders** that were designed to be nudges.
- Before **RAG** became popular, I created a health search engine based on **150k minutes** content from 6 YouTube channels. Used Apache Airflow for fetching new vidoes everyday and processing into vectors that were stored in Pinecone.

Centre for Development of Advanced Computing (C-DAC) Pune
Project Engineer (NLP R&D) - Applied AI Group Mar 2021 - Jan 2023

- Working on end-to-end 360-degree profiling of person entities from unstructured text. Using BERT based model for relation extraction, a custom trained SpanBERT model for coreference resolution on OntoNotes 5.0, building custom dataset for said task.

Cognizant Technology Solutions Chennai - Bangalore
Developer - Oracle Fusion Middleware Nov 2017 - Feb 2020

- Led a team of 3 members, wrote Oracle Data Integrator (ODI) code for data migration for a retail client based out of the middle-east.

Education

Centre for Development of Advanced Computing (C-DAC) Pune
PG Diploma Artificial Intelligence - *Grade: A* Feb 2020 - Feb 2021

Smt. Kashibai Navale College of Engineering Pune
B.E. Computer Engineering - *72%* Aug 2013 - Jul 2017

Languages and Technologies

- Python
- PostgreSQL, Redis, Pinecone
- LLMs - OpenAI, Gemini. HuggingFace, Ollama
- Git, FastAPI, Streamlit, Docker
